STRUCTURE SOUNDNESS CERTIFICATE

Subject: Study of Structure stability and soundness of the building of Adarsh Public School, Vinayak Nagar, Pedagantyada, Visakhapatnam-530 044

Ref: Letter from Adarsh Public School, Vinayak Nagar, Pedagantyada, Visakhapatnam-530 044 bearing No. APS/10/2026/001 dated 07-01-2026

With reference to the letter cited above, Dr.K.Srinivasa Rao, Professor of Civil Engineering, Andhra University, Visakhapatnam visited the said structure mentioned in the subject on 11-01-2026 to inspect the school building for its structural stability and soundness. The school building is an RC framed structure with Ground + 2 floors along with a rafter supported galva aluminium sheeted roofing on the terrace floor. Relevant structural drawings of the building are not available. It is informed that the structure is about 7 years old and constructed by VMRDA. All the RCC structural elements like columns, beams and slabs are found to be in good condition. There is no visible distress anywhere in the structural members of the structure. In the present condition, this school building is structurally stable and sound to take care of the loads specified for a school building. However, proper maintenance is essentially to be extended continuously. The validity of the certificate is only for a period of four years from the date of issue of this certificate.
